

Tôi đã cài gói hyperref mới và refresh khi cập nhật gói này, nhưng nó vẫn báo thế này

```
TeXify ...
<tableau.sty>
LaTeX Warning: Unused global option(s):
  \pagebreaks 1.

<"bai tap day so.aux"> <"C:\Program Files\MiKTeX 2.6\tex\latex\ontex\t5phu.fd">
<"C:\Program Files\MiKTeX 2.6\tex\latex\hyperref\nameref.sty">
<"C:\Program Files\MiKTeX 2.6\tex\latex\oberdiek\refcount.sty">
<"bai tap day so.bm"> <"bai tap day so.bm">

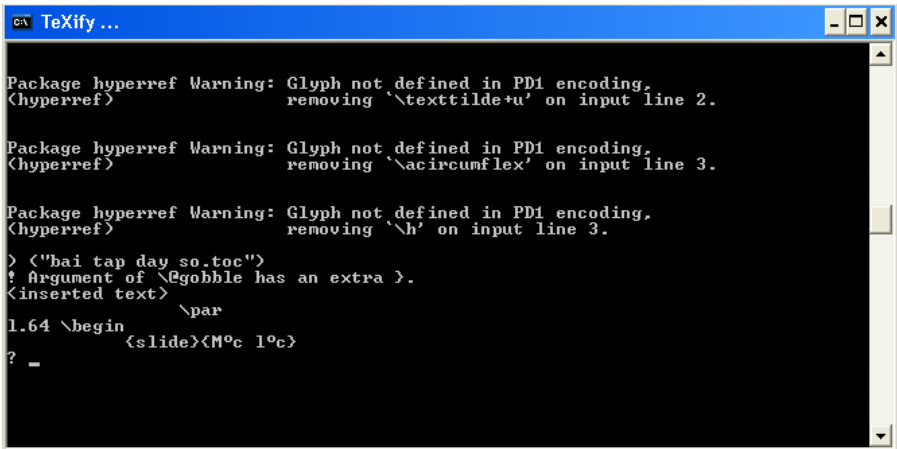

Package hyperref Warning: Glyph not defined in PD1 encoding,
(hyperref)                removing '\d' on input line 1.

Package hyperref Warning: Glyph not defined in PD1 encoding,
(hyperref)                removing '\d' on input line 1.

Package hyperref Warning: Glyph not defined in PD1 encoding,
(hyperref)                removing '\h' on input line 2.

Package hyperref Warning: Glyph not defined in PD1 encoding,
(hyperref)                removing '\ecircumflex' on input line 2.
```

Nếu tôi cũng bỏ option[pagebreaks], máy vẫn báo lỗi.

```
TeXify ...

Package hyperref Warning: Glyph not defined in PD1 encoding,
(hyperref)                removing '\texttilde+u' on input line 2.

Package hyperref Warning: Glyph not defined in PD1 encoding,
(hyperref)                removing '\acircumflex' on input line 3.

Package hyperref Warning: Glyph not defined in PD1 encoding,
(hyperref)                removing '\h' on input line 3.
